FLAT ROCKS WIND FARM

I would like to raise my concerns regarding this Wind Farm application.

Surely the studies that have been released in 2010 regarding the health issues with the Waubra Wind Farm in Victoria is enough for our Shire to realize that this application should not even be a consideration.

We have now become aware of the health issues with humans but can someone give me any answers to what affect these turbines might have on our live stock?

Also, do you think it is fair for farming families living next to these turbines?

Studies reveal that values of properties can drop as much as 30% with turbines close by which I consider totally unfair.

I thought our Shire was meant to be progressive and encourage families to our district. Having these wind turbines will be a sure way to decrease numbers in our school system, and stop newcomers even considering Kojonup as an option.

Yours faithfully

DB Norrish
