Dear Sir ,

Re Moonies Hill

I refer to your earlier correspondence in which you invited my comment and views on  
the proposed development by Moonies Hill .

I have sought answers to my queries of the proponent of the development .In excess  
of ,a month has now elapsed and no answers have been received .I anticipate that  
further queries will arise if and when I receive answers to my legitimate questions  
and which were invited by the proponent in their media statements .

Can you please advise of the status of the application and what consultants reports  
you have received as well as the likely timeframe for the Council to make a decision  
and whether any opponents will be given the opportunity to make detailed submissions  
especially in light of the Senate Enquiries findings ,recent medical information that  
has come to light in relation to low frequency infrasound ,recent legal cases on Town  
Planning Schemes on loss of amenity and zoning issues ,

I also enquire whether it was the applicant or the council that determined what  
reports would accompany the application as it appears that many key issues have not  
been addressed.

I have a number of serious concerns which have been raised with the proponent but  
these remain unanswered .

As a lot has now transpired surrounding wind farms since you originally notified me  
some 6 months ago , I would wish to make further detailed submissions to the comments  
I made following your earlier invitation and when my questions have been answered by  
the proponent .

I also enquire whether the council has obtained any independent experts reports  
itself on diminution in land values and the adverse health issues that have recently

come to light .

I also enquire as to whether the shire is aware exactly where each turbine is proposed to be sited and exactly how many are in each shire .

I also draw the Council to the fact that the development if approved may have serious consequences in relation to adjoining landowners obligations under O H and S Acts and Regulations to provide a safe working environment especially where accommodation is supplied as part of remuneration packages ,the potential voiding of existing insurance policies,adverse aerial firefighting setbacks ,foreseeable adverse health issues ,foreseeable loss of rural amenity and ensuing diminution in land values .

I look forward to hearing from you and submit that the proponent should pursue a development in an area with a lower population density unlike where it is currently proposed where my average property lot size is 160 acres and which is clearly in breach of the existing Town Planning schemes of the two effected shires .

Yours Faithfully

Elizabeth Atkins
