6. With the intention of preserving the existing natural vegetation and mature trees and preventing land use practices detrimental to the amenity of the locality, the approval of the Council is required for any intensive agricultural pursuit. The Council will have regard to limits on stocking, the limited groundwater resources, tree and vegetation preservation and the effects on the environment of the locality and residents of the estate when considering the application and may, should approval be granted, impose any conditions as practical and may modify or vary such conditions to take account of seasonal changes.

7. On-site effluent disposal systems servicing development on the lots shall be to the satisfaction of the Local Government. In the event that a nutrient fixing effluent disposal system is not required every dwelling shall have connected to it an effluent disposal system that:

12. The developer of the estate shall maintain the trees and shrubs planted within the Tree Planting Area and vegetation to be retained on each lot to the satisfaction of the Council until the land as a whole or in lots is sold. Thereafter the new landowner(s) shall be responsible for the maintenance and the replacement (if and where necessary) of those trees and shrubs planted by the developer and vegetation retained on each lot to the satisfaction of the Council.

13. The developer shall notify in writing any prospective purchaser of the requirement for the continued maintenance of strategic revegetation areas within the estate.

Column (a) Locality

Column (b) Provisions

14. The keeping of horses, sheep, goats and other grazing animals shall be subject to the prior approval of the Council. Approval to keep animals shall not exceed the stocking rates recommended by the Agriculture Western Australia for the applicable pasture types.

Council may approve the grazing of animals provided that Council is satisfied that nutrient input to the land can be controlled and that such will not result in the removal or damage of the vegetation and trees or result in soil erosion and dust pollution. As a condition of approval Council may require the animals to be stabled or corralled.

Where in the opinion of the Council the continued presence of animals on any portion of land in the estate is likely to contribute, or is contributing to dust pollution or soil erosion, notice may be served on the owner of the said land, requiring the immediate removal of those animals specified in the notice for a period specified in the notice.

15. At the time of building application for each lot a plan of the site shall be submitted by the applicant to the satisfaction and specifications of the Council which shall show site contours, existing trees and stands of vegetation, those trees and vegetation to be removed and retained and proposals for tree planting, vegetation and maintenance.

The developer of the estate, the Council and property owners shall be mindful of and comply with the provisions of the Environmental Protection (Swan Coastal Plain lakes) Policy 1992 and Statement of Planning Policy No.2—The Peel-Harvey coastal Plain Catchment. The developer shall notify in writing any prospective purchaser of this provision.

17. All development is to be setback 30m from all subdivisional roads and 10m from all other boundaries, except that a 50m landscaped buffer is required along the Kwinana Freeway Reservation.
